DETAILED ACTION

Oath/Declaration

1. The oath or declaration is defective. A new oath or declaration in compliance with 37 CFR 1.67(a) identifying this application by application number and filing date is required. See MPEP §§ 602.01 and 602.02.

The oath or declaration is defective because: the duty to disclose statement should recite the following statement exactly:

"I acknowledge the duty to disclose information which is material to patentability of this application in accordance with Title 37, Code of Federal Regulations Section 1.56."

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-28 are rejected under 35 U.S.C. 102(b) as being anticipated by Perlman (U.S. 5,558,339).

Perlman discloses an apparatus and method for linking multiple remote players of real-time games over a traditional telephone line. Perlman accomplishes this goal by having prospective players dial into a server which determines, based on a telephone number and information provided by a player, which players to connect to each other to play the game. Once this match is determined, both players are disconnected from the server, and one of the player's computers automatically dials the other player's phone number and establishes a direct connection via a traditional telephone line to play the game.

Art Unit: 3714

Perlman describes a player's phone number as an "address" or "network address" in a data network. However, due to privacy concerns, a player's phone number is not "explicitly" shown to the opposing player. Rather, a screen name or handle, and identification code is sent and displayed by both computers. (Figures 3, 4, and 8, Column 10, lines 18-35, and Column 11, lines 20-49). Furthermore, players are able to communicate with each other during the game (Column 41, line 65-Column 42, line 56).
